

Sand Lake Property Owners' Association
Lake Management Committee
Report

The SLPOA Lake Management Committee has been meeting since October, 2012. The committee has focused on the continuation of treatment of Sand Lake for invasive species and plans/proposals to deal with the weed/muck issues in the lake.

The committee did make two recommendations to the SLPOA Board.

- 1) Continuation of the Special Assessment District: Sand Lake Weed Control Assessment District; using previous language, at the same assessment rate (\$100.00 per property) for five (5) years.
- 2) Treatment of Sand Lake for the 2013 season should be a continuation of copper products for Starry Stonewort and Fluridone (Sonar) for Eurasian watermilfoil.

The committee continues to meet to discuss the weed/muck issues on the lake, attempting to identify methods for treatment and sources for payment.
