Sand Lake Spring Treatment

Week of May 6, 2013

PLM will be performing the Eurasian watermilfoil spring treatment for Sand Lake the week of May 6, 2013. Shorelines and the Public Access site will be posted on the day of the treatment (Tuesday, May 7 or Wednesday, May 8). There will be a one (1) day swimming restriction and thirty (30) day or less restriction for watering lawns and plants with lake water, as per standard guidelines. PLM will be applying Fluridone (Sonar) at 6 parts per billion and at that rate of application the thirty day watering restriction will not actually apply and be much less. A bump application will need to be applied on May 28 or 29 (after Memorial Day).
